

## A LETTER FROM THE FOUNDER

Endodynamic, a company dedicated to promoting social change through innovative technologies, has launched its "Our Promise to the World" NFT collection. This unique collection features a collection of original artworks, each one accompanied by a host of exciting perks and benefits for its owners. The collection represents a bold step forward in the world of NFTs and agriculture in general. The funds raised by the issuance will be used to develop the blending, production & distribution infrastructure needed to bring the AG3 system everywhere it is needed in order to stamp out World Hunger.

The "Our Promise to the World" NFT collection is a true celebration of art, technology and philanthropy. Each NFT sold will come with a 10% donation to charities committed to ending world hunger, paired with a 10% donation from the sale of prints of the NFTs, available on the company's website. Endodynamic is committed to making a difference in the world, and the "Our Promise to the World" NFT collection is just one way that we are giving back. The NFT issuance is backed by the company's intellectual property, assets, trade secrets, patents, copyrights and trademarks.

We have created 2 additional collections called "Out of This World" and "What A Wonderful World" which will launch on June 3, 2023. These collections will carry their own unique perk packages which can be found under the Endoingenious tab on our website . Our purpose for the NFTs is two fold. It gives us the required capital to install our production facilities around the world and it gives us a global presence. In addition, it allows us to sign up Master Distributors in key locations through our Affiliate Marketing Program. Our Affiliate program is incorporated in the back office of our website at [www.endodynamic.com](http://www.endodynamic.com) where our NFT Collection can also be viewed.

In addition to the charitable aspect of the collection, buyers will also receive a host of exciting perks. These include, for the entire duration of the ownership of the NFT, a royalty of 3.3% annually based on the company's net profits. This 3.3% royalty will be shared among the NFT Club members, a 15% discount on the stock price under a private placement offering when the company elects to return to public trading, the honorary title of "Endo Quantum Founders Club," complete with special emblems, a wall diploma, and a letter from the company's founder.

Endodynamic is proud to be at the forefront of innovation in the NFT world. The company's cuttingedge technologies have enabled it to create a collection of artworks that is truly unique and special. The company's mission is to use technology to drive social change and make the world a better place by STAMPING-OUT WORLD HUNGER.

Our Collections of original art works/NFTs are just the latest example of the company's commitment to this mission. With each purchase, buyers will be supporting a worthy cause, while also gaining access to a range of exciting perks and benefits.

The mission goes beyond just selling NFTs. At Endodynamic, we are dedicated to finding solutions to the global food crisis. The science-based technologies and techniques address the

water and atmosphere plants need to grow. Our patented "Ag3" technology package combines trade secret plant sound technology, patented microbial root-2-fruit nutribalance amendment, and atmospheric enhancement, together with a water rejuvenation system to create the prerequisites for a successful, high-yielding harvest. Naturally, it's all ORGANIC!

By reintroducing balance and harmony to plants via frequencies referred to as isochronic waves or nanotechnologically generated tones, they are guided back into circadian rhythms present all around, returning them to the natural rhythm of nature. This advanced approach yields results that are superior to both the quality and quantity of traditional agriculture methods in use today, seeing yearly increases of up to 35-40%.

In addition, our innovative, patented transportation system solves logistic issues related to moving resources, making it possible to bring food resources to areas that are highly populated by the less fortunate when it comes to agriculture and food resources. The stackable systems can be directly placed on flatbed rail cars and/or placed on farms as portable stackable silos, where they can be used as storage capacity for an unlimited amount of time, an absolute GAME CHANGER for the world and the effort to stamp out world hunger.

Endodynamic is confident that our unique collections will be a huge success. The company is committed to promoting social change and making a positive difference in the world, and this collection is just one way that we are achieving this. So, whether you are an art collector, an NFT enthusiast, or simply someone who wants to make a difference in the world, the "Our Promise to the World" NFT collection is not to be missed. Visit [www.endodynamic.com](http://www.endodynamic.com) today to learn more and make your purchase. Together, we can make a difference and create a better world for all.

Cordially,

*Allen Lopez*

## AG3 MASTER DISTRIBUTION AND MARKETING PLAN

**Endodynamic** will produce organic microbial-based agricultural soil amendments and bio stimulants for the farming and home gardening industries. Our products will help increase crop yields, improve soil health, and reduce the need for chemical fertilizers and pesticides. Our team has extensive experience in the agricultural production industry and a passion for sustainable farming practices. We believe that our products will be in high demand as more farmers look for environmentally friendly and efficient ways to improve their soil and increase their yields.

**Market Analysis:** The global agricultural market is expected to reach \$7.8 trillion by 2022, with a significant portion of the market being focused on organic and sustainable farming practices. The demand for organic soil amendments and bio stimulants is growing rapidly as farmers seek to improve their yields while reducing their environmental impact. Our target market will be small to medium-sized farms around the globe that are committed to sustainable farming practices and are looking for highquality, organic soil amendments and bio stimulants.

**Product Description:** Our products are organic and microbial based, consisting of a blend of beneficial microorganisms that work to improve soil health and increase crop yields. Our products will be available in liquid and granular forms and will be formulated to meet the specific needs of different crops and soil types. We use only the highest quality ingredients in our products and conduct extensive testing to ensure that our products are effective and safe for the environment.

**Marketing and Sales Strategy:** We market our products through a variety of channels including affiliate referral marketing, trade shows, social media and industry publications on a global scale to reach a wider audience. We will also develop relationships with local agricultural co-ops and distributors to reach a wider audience. Our sales team and master distributors will focus on building relationships with farmers and organic home gardeners providing them the information they need to make informed decisions about our products. We will also offer educational materials and training sessions to help farmers better understand the benefits of our products.

**Operations and Management:** Our production facilities is located in the Woodlands/Conroe, TX. areas and we will setup strategic blending facilities and global safety zones with easy access to raw materials and transportation. We will hire a team of experienced agricultural professionals to manage our operations and ensure that our products meet the highest standards of quality and safety. Our management team is comprised of MIT engineers, PhDs in agronomy, logistics experts and financelaw professors.

**Financial Plan:** Through our 3 phase NFT marketing we intend to raise upwards of \$18 million dollars. The funds will be used to develop our production blending facilities and the development of our products. We anticipate generating upwards of \$150 million by conclusion of the year

2024. We project annual revenue increases of 30% to 50% by the year 2027. We will focus on managing our costs maintaining a high level of efficiency to ensure that we achieve high profitability.

**Conclusion:** Our company is well positioned to meet the growing demand for organic soil amendments and bio stimulants in the agricultural industry. We have a strong team with extensive experience in the industry and a passion for sustainable farming practices and green technologies. We believe that our products will be in high demand as more farmers and home gardeners look for environmentally friendly, and efficient ways to improve their soil and increase their yields and grow organically. The mission of Endodynamic is to Stamp Out World Hunger through the distribution of our AG3 Advance Agriculture System. We are committed to teaching the world to grow its own food organically so they can thrive and not just survive. Our affiliate marketing strategy with shared revenues will assist in achieving our mission.

## ENDODYNAMIC AFFILIATE MARKETING PLAN

Our affiliate marketing strategy aims to provide profitable solutions to businesses that want to expand their customer reach and increase their sales. Our business model is centered around connecting businesses with relevant affiliate marketers who will promote their products or services to potential customers. We believe that this business model will not only benefit businesses by increasing their revenue, but also provide affiliate marketers with an opportunity to earn passive income.

**Market Analysis:** The affiliate marketing industry has been steadily growing over the years, with an estimated market size of over \$12 billion in the US alone. This growth can be attributed to the increasing popularity of e-commerce, the rise of social media influencers and bloggers, and the demand for cost-effective advertising solutions. Our target market will be small to mid-sized businesses that are looking to increase their revenue through affiliate marketing.

**Business Model:** Our business model will be centered around connecting businesses with relevant affiliate marketers who will promote their products or services to potential customers. We will charge businesses a percentage of the sales generated by our affiliate marketers. We will also provide training and support to our affiliate marketers to ensure that they are equipped with the necessary skills to promote our clients' products or services effectively.

**Marketing Strategy:** Our marketing strategy will be focused on building relationships with businesses, small farms, home gardeners and affiliate marketers. We will attend industry events, participate in online forums and groups, and utilize social media to reach out to potential clients and affiliates. We will also utilize targeted NFT marketing to reach businesses, master distributors and affiliate marketers who are interested in our services.

**Financial Projections:** Our projected expenses for the year 2024 is approximately \$18 million. Our projected revenues are approximately \$150 million based on our estimated commission rate of 20%. We anticipate that our revenue will increase in the following years as we expand our client base and establish ourselves as a trusted affiliate marketing company.

Conclusion: Our affiliate marketing strategy aims to provide profitable solutions to businesses and individuals that who wish to expand their customer reach and increase their sales. We believe our business model will benefit businesses by increasing their revenue. We are confident that our marketing strategy, combined with our state of the art Patented Green Technology will provide excellent service to the global agriculture community. Our commitment to providing excellent service to our clients and affiliates will enable us to achieve our financial projections and establish ourselves as a leading affiliate marketing company.
